

CubicMeter Product Broschure

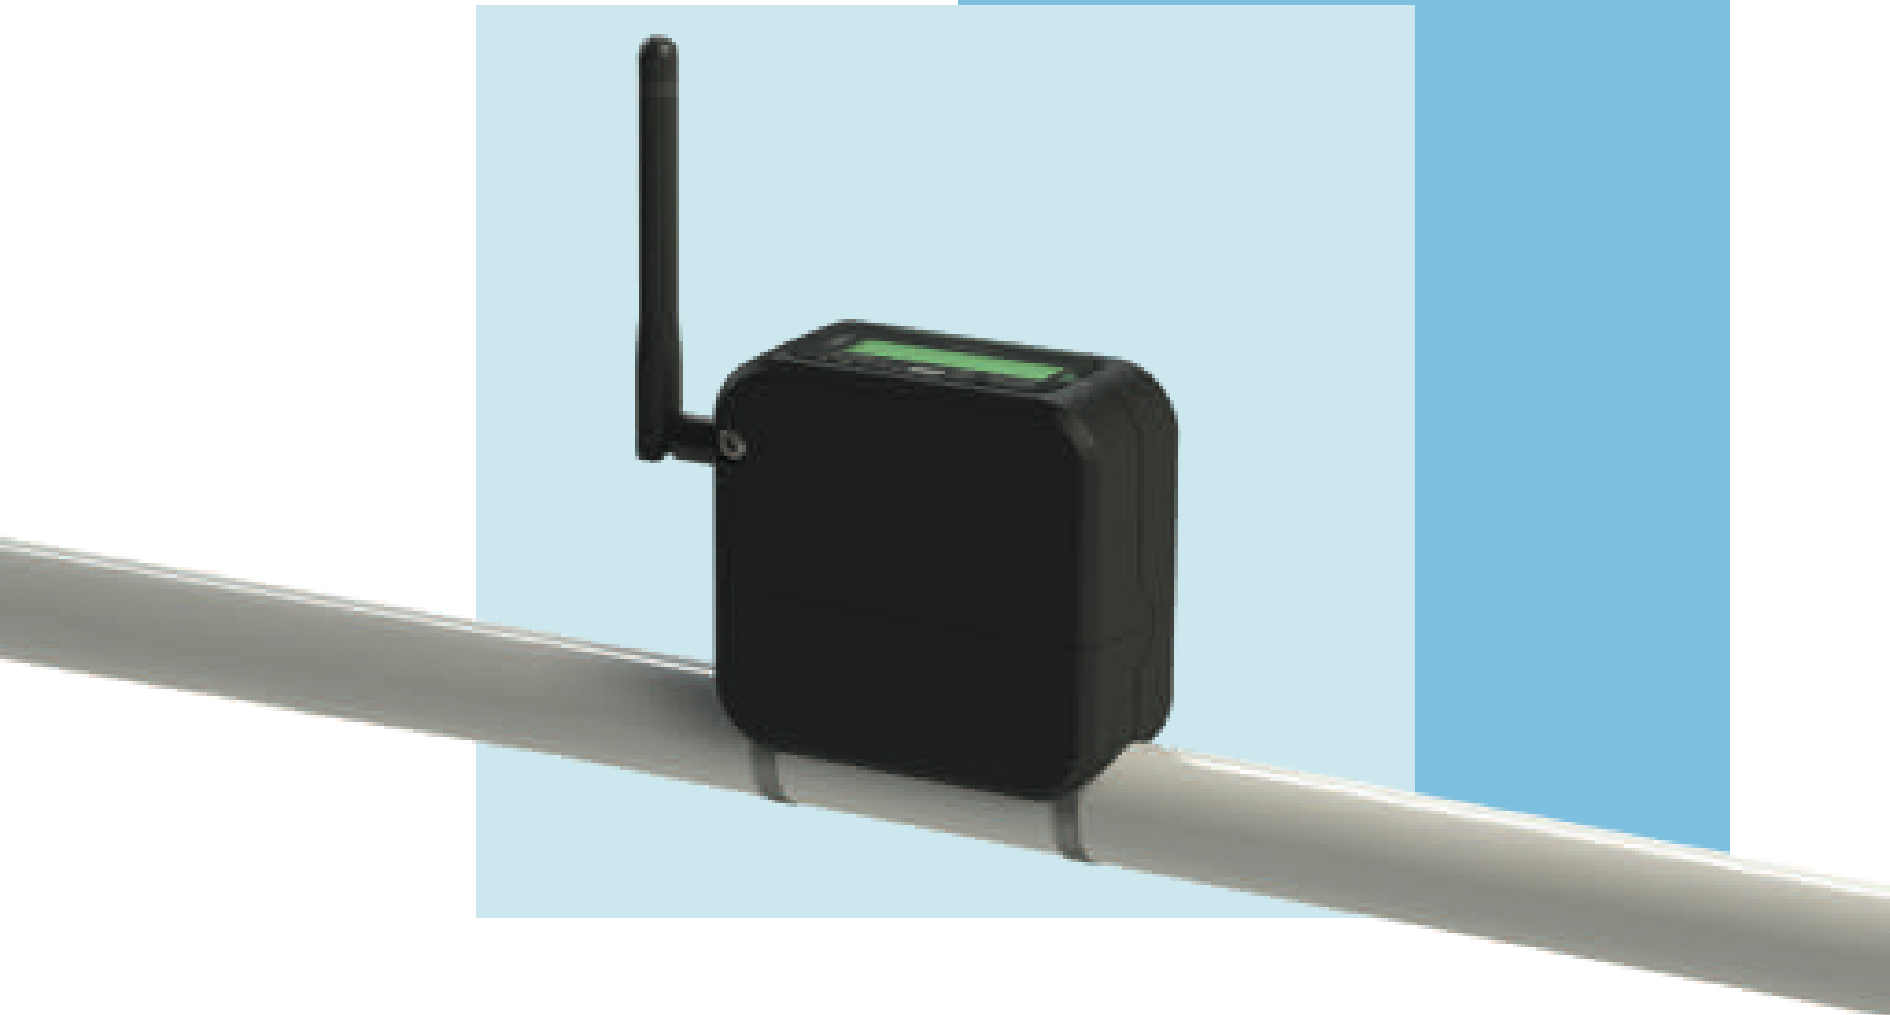

2021 EDITION

Non-invasive water & leakage monitor

CubicMeter

Labtrino AB has developed an intelligent platform for Smart Water Security, enabling cost efficient sub-metering and leakage detection. The platform utilises machine learning to break down water usage data into outlets from a single, patented, non-invasive sensor. In our smartphone app, tenants then receive individually tailored nudges on how to efficiently lower usage, without sacrificing comfortability.

CubicMeter

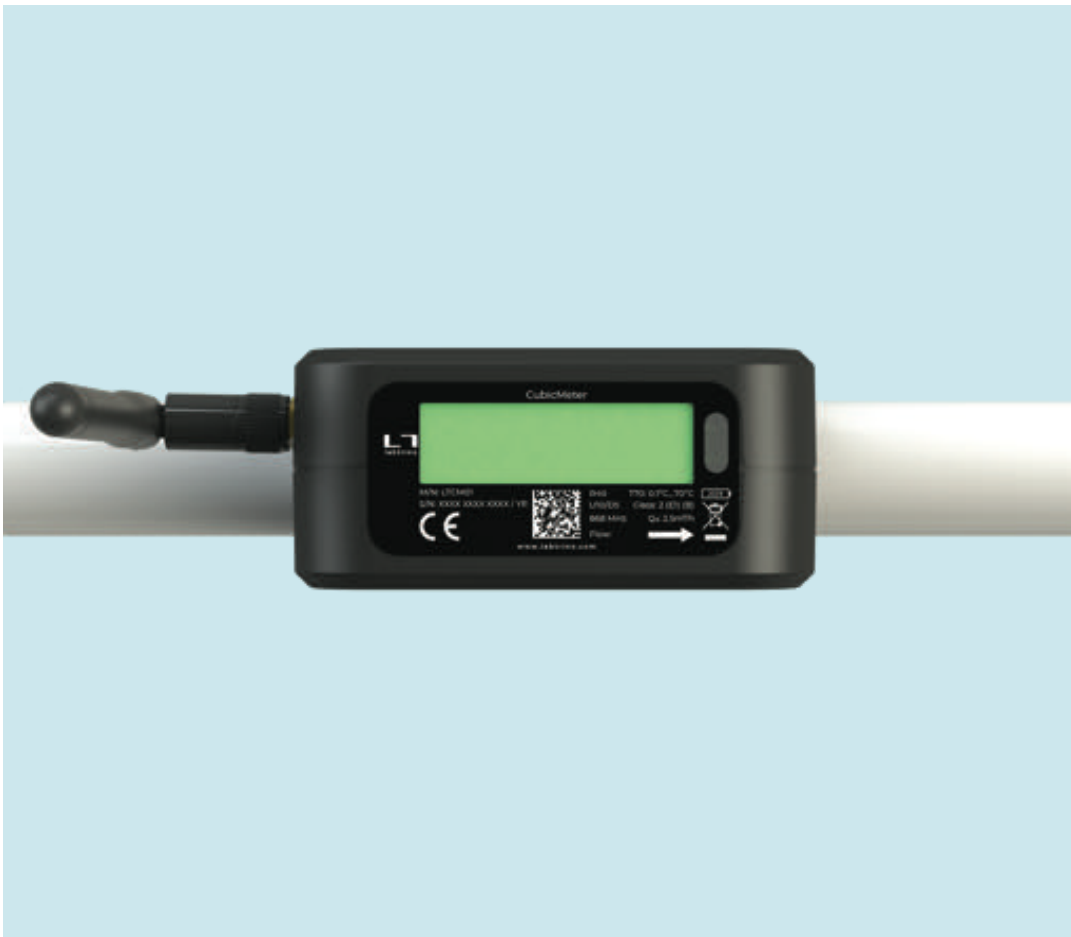

Drip leakage detection

Wireless: LoRa & W-MBus at 868 MHz

One design, multiple pipes: 15 - 26 mm plastic & multi-layered pipes

Plug & Play installation

Anti-tampering

Patented technology

Up to 98 % accuracy

MID Compliant

Up to 10 years battery life

Low maintenance

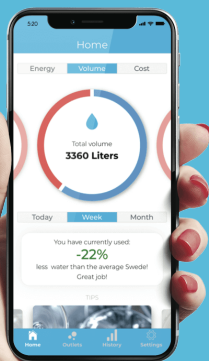

No plumbing required

CubicMeter - App & Portal

Manage and visualise data in the web dashboard and let your tenants follow up their consumption using the app.

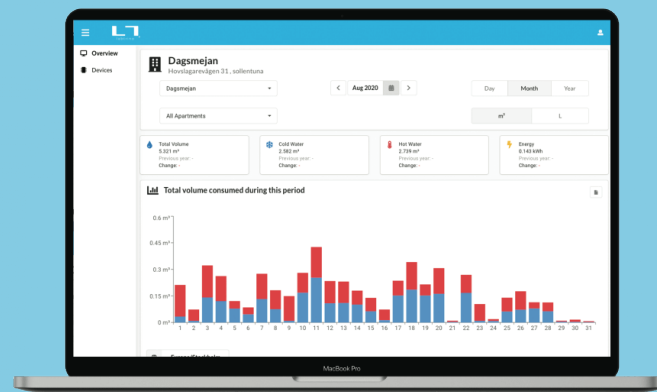

Resident's app

Gamify water usage
Raise awareness
Leakage notifications

Property Manager's tool

Leakage notifications
API for existing systems
Historical consumption trends
